“ *I was saddened to read Dr. Cleaver's obituary in the newspaper. Gene and I worked together for about 10 years. I as a critical care nurse and he as the new doctor in town. He was a great mentor, true compatriot, friend, and a very good physician. I have often thought about him over the years since moving away from the area and have fond memories of our work experiences. He is no longer with us but listen--his spirit whispers nearby. My sincere condolences to the family. Anna Salanti*
